

3M Hot melt kits and accessories

Industry adopted preloaded adhesive connectors with a proven record of high performance and ease of use in LANs around the workplace.

Preloaded adhesive means no epoxy to mix and fewer consumables to use. Terminates in under 4 minutes. Ability to reposition fibre gives virtually a 100% yield. Suitable for both internal and external applications.

The 3M Hot Melt termination kit contains all of the tools and consumables required to terminate 3M ST, SC and FC Hot Melt connectors. A Hot Melt conversion kit is available for users who already have fibre preparation tooling and just need the equipment required for Hot Melt termination. The kit contains an oven, connector holders (for ST, SC and FC), cooling stand, polishing pucks and pads, lapping films, demonstration video and instruction manual.

Product description

Part No.

Stk Code

Multimode Hot Melt connectors

ST plug black boot	6100B1K-S	115-29F
ST plug red boot	6100R1K-S	115-30A
ST plug white boot	6100W	110-95D
SC plug white boot	6300W1K-S	118-52E

Singlemode Hot Melt connectors

ST plug yellow boot	8100YS	161-14A
SC plug white boot	8300	168-69F

Hot Melt kits

Hot Melt termination kit	6351	118-53F
Hot Melt conversion kit	6157	111-00C

Hot Melt consumables kits, includes lapping films, jig and cloths

Classic consumables kit	6365-CC	181-91B
UHT consumables kit	6365-CU	181-92C

Hot Melt accessories

Polisher (230V power supply)	6851E	181-89F
ST plug holder pack of 6	6190	111-45F
